

## External control kits

External control kits are intended for incorporation of manual control for various 24 V DC Simco-Ion devices. They provide a potentiometer to control settings, an LED for visual control and in- an outputs.

The kit consists of a small control board and a self-adhesive label. The control board can be easily mounted in a panel or separate box. The self-adhesive label is glued on the outside a form indicators and to scale.
Various kits are available with special functions for the individual products:
( MPM: external ion balance control
( ( Performaster: external setpoint contro
(1) CMME and CM Tiny: external setpoint control

Technical specifications

|  | MPM | Performaster | CMME/ CM Tiny |
| :--- | :--- | :--- | :--- |
| Input voltage | 24 V DC max 120 mA | 24V DC $>500 \mathrm{~mA}$ | 24 V 1 A |
| Controlvoltage |  | $0-10 \mathrm{~V}$ or |  |
|  |  | $0-10$ | $0-24 \mathrm{~V}$ |
| Manual control | $(-10)-0-10$ | $0-100 \%$ |  |
| Remote on/off | 24 V DC max. 30 mA |  |  |
|  |  |  |  |
| Cycle ok | Outputs |  |  |
| Setpoint feedback |  | 24 V DC max 50 mA |  |
| Remote setpoint |  | $0-10 \mathrm{~V}$ DC max 10mA |  |
| LED | Pulse detected | $0-20 \mathrm{~mA}$ |  |
| PLC | 24V DC max.30mA 15 ms |  |  |
